

Qexchange — a quantum leap

Q Innovation announces Qexchange ... knowledge exchange software that creates an enhanced online work environment for a department, organization or enterprise.

Qexchange customers realize productivity gains through knowledge exchange that is collaborative, fluid and useful.

Now you can exchange knowledge with peers, experts and organizations.

"The most important contribution management needs to make in the 21st century is to increase the productivity of KNOWLEDGE WORK and the KNOWLEDGE WORKER."

– Peter F. Drucker

What is *Qexchange*?

Qexchange is knowledge exchange software designed to improve decision-making, speed workflow and promote effective inter- and intra-departmental collaboration.

Innovative ...

Innovation is the cornerstone of *Qexchange*. Highly advanced self-organizing, adaptive technology makes *Qexchange* smarter and more helpful with each user visit, while remaining easy to manage at any scale.

Modular ...

A suite of complementary modules allows *Qexchange* customers the flexibility to configure and grow their knowledge exchange environment in a way that best meets their business goals and priorities.

Open ...

For ease of systems integration and scalability, *Qexchange* adheres to the leading open software standards – Enterprise Java Beans, J2EE, JSP, XML and SQL.

How does *Qexchange* improve productivity?

Qexchange enhances workforce productivity through web-based collaboration, knowledge exchange, and a self-service work environment that captures the specific user's point of view across the enterprise, regardless of job function.

Collaborative ...

When employees are virtual, regional and global ... timely and meaningful collaboration is even more critical to business success.

Online collaboration is central to *Qexchange*. Users can discuss, suggest, notify, review, rate, recommend, consult, seek and find experts, contribute, participate and "make things happen" – *without boundaries*.

Fluid ...

When employees can easily contribute business knowledge that others can find, reuse, modify and improve ... everyone saves time.

Qexchange simplifies the process of creating, growing and managing complex, distributed knowledge repositories. Qexchange users can contribute to their enterprise or departmental knowledgebase at any time. Contributors receive multiple types of feedback from users ranging from ratings, reviews and evaluations to statistical retrieval data. All this real-time feedback results in the **continuous growth and improvement** of the knowledgebase.

Useful ...

When employees can quickly find what they need, retrieve it in the most convenient format, and provide feedback to assure its continual improvement ... productivity soars and business benefits.

Qexchange's performance-centered design organizes business intelligence around each user's unique needs and point-of-view. Multiple options for convenience and speed in seeking, acquiring, packaging and transporting information make Qexchange an **invaluable time saving tool**.

Who can benefit from Qexchange?

Qexchange can be configured to map specifically to your unique business requirements – by function, by department, by organization, by region or across your entire enterprise. Qexchange can enhance productivity across a broad range of organizational entities, including...

Sales & Marketing Operations	Customer Service Product Management	Education and Training Professional Associations
---	--	---

Employees depend on Qexchange because it's quick, convenient and reliable, saves time and increases effectiveness.

Operations Managers see qualitative increases in employee job satisfaction and a marked decrease in time on task.

Executives welcome measurable increases in productivity and improved service levels, both of which can lead to greater revenues.

IT Professionals enjoy the system's reliable performance, ease of maintenance, and ability to scale and integrate with other systems.

Training Professionals create innovative performance support solutions that organize knowledge around the work people do.
